# 2024 PSYCHOLOGY LICENSING EXAM SCORES - THE EPPP (PART 1–KNOWLEDGE) - BY DOCTORAL PROGRAM

## FOREWORD

The Association of State and Provincial Psychology Boards (ASPPB) is pleased to present the 25<sup>th</sup> edition of *Psychology Licensing Exam Scores by Doctoral Program*. It includes graduate training programs accredited by the American Psychological Association and Canadian Psychological Association.

This report includes data on first-time takers who took the Examination for Professional Practice in Psychology (EPPP Part 1-Knowledge) during the period from January 1, 2019 through December 31, 2023. The doctoral programs presented in the report are based on the 2023 American and Canadian Psychological Association accredited doctoral programs.

The list of Doctoral Programs in Psychology is accompanied by summary information on the performance of candidates for licensure by graduate program. ASPPB considers a passing point for independent practice equals to a scaled score of 500. The statistical information for candidates include, where the number is five or greater, the number of candidates testing from the program, the pass rate, and the percent scores by content areas. Where the number of candidates tested per program is four or fewer, neither number tested nor the pass rate is shown. This is done to protect the privacy of candidates who come from programs with low numbers of graduates. Pass rate information in this report is presented on the basis of the number of candidates with a scaled score of 500 or more. Responsibility for actual pass/fail decisions rests with individual licensing jurisdictions.

Please note that care should be exercised if comparisons across schools and programs are made. If performance on the EPPP (Part 1-Knowledge) is seen as an outcome measure of those objectives, it should be viewed as only one such measure.

**The program data presented are based solely on information supplied by candidates when they apply to sit for the EPPP (Part 1-Knowledge).**

We believe that those who train psychologists and those who examine them for licensure must maintain an ongoing dialogue to better serve the candidates for licensure and the consumers of psychological services. Our intent is to make the *Psychology Licensing Exam Scores by Doctoral Program* a document that will inform and educate individuals selecting a doctoral program, their educators and trainers, and the developers of the EPPP. To that end, we encourage your comments and suggestions. Correspondence should be sent to the ASPPB central office at [asppb@asppb.org](mailto:asppb@asppb.org).

We sincerely hope that this document will prove useful to faculty members and students of psychology. We very much appreciate your interest in licensure and the EPPP.

Michelle G. Paul, PhD  
President, Board of Directors

Mariann Burnetti-Atwell, PsyD  
Chief Executive Officer

Hao Song, PhD, ICE-CCP  
Associate Executive Officer of Examination  
Services

Christy Cogley  
Director of Examination Operations

## THE PURPOSES OF THE EXAMINATION FOR PROFESSIONAL PRACTICE IN PSYCHOLOGY (EPPP)

The Examination for Professional Practice in Psychology (EPPP), developed and owned by the Association of State and Provincial Psychology Boards (ASPPB), is provided to state and provincial boards of psychology to assist them in their evaluation of the qualifications of applicants for licensure and certification. This standardized examination is administered continuously in a computerized delivery format through the Pearson VUE network of computer testing centers with the support of state and provincial psychology boards acting collectively through ASPPB.

The resources of individual psychologists, ASPPB, and contracted test development professionals are used in the ongoing development and improvements to the Examination Program. These combined resources are greater than those available to any individual board.

ASPPB has spent more than 15 years evaluating the need and methods to assess competency, and the revised EPPP includes the EPPP (Part 1-Knowledge) and the EPPP (Part 2-Skills) as a comprehensive competency assessment that allows licensing authorities to evaluate both foundational knowledge and practical skills.

Until recently, the EPPP (Part 1-Knowledge) was only one part of the evaluation procedure used by state and provincial boards/colleges. In order to determine candidates' competence to practice the profession of psychology, boards/colleges use both the EPPP (Part 1-Knowledge) and the EPPP (Part 2-Skills) or supplement the EPPP (Part 1-Knowledge) with other requirements and assessment procedures. In this report, only the EPPP (Part 1-Knowledge) performance is reported. For concision, the EPPP performance in this report refers to the EPPP (Part 1-Knowledge) scores.

The EPPP (Part 1-Knowledge) is intended to evaluate the knowledge that the most recent practice analysis has determined as foundational to the competent practice of psychology. Most candidates taking the EPPP (Part 1-Knowledge) have obtained a doctoral degree in psychology, completed a year of supervised experience, and have completed or will complete appropriate postdoctoral experience. Such candidates are expected to have acquired a broad basic knowledge of psychology, regardless of individual specialties. This knowledge and the candidate's ability to apply it are assessed through the candidate's responses to objective, multiple-choice questions representative of the field at large. The average pass rate of doctoral-level candidates from accredited programs who are taking the test for the first time exceeds 80% in most sample years. The COVID-19 pandemic may have influenced doctoral training and student learning; the EPPP (Part 1-Knowledge) for the past five years showed approximately a 3% drop in the first-time passing rate.

## TEST CONSTRUCTION

The ASPPB Examination Committee (ExC1) is responsible for the construction of the EPPP (Part 1-Knowledge). ExC1 members are appointed by the Board of Directors of ASPPB and are chosen for their exceptional credentials and outstanding achievements in their respective specialties.

The examination development process is intended to maximize the content validity of the examination. The ASPPB Item Development Committee (IDC1) is appointed by the ASPPB Board of Directors and is charged with overseeing the item writing process. Members of the IDC1 are chosen for their expertise and credentials in the specific domains that comprise the content of the EPPP (Part 1-Knowledge).

The ASPPB Item Review Committee (IRC) is also appointed by the ASPPB Board of Directors and is tasked with reviewing EPPP (Part 1-Knowledge) items identified through Differential Item Functioning (DIF) analysis as performing differentially across identified groups due to potential bias toward a particular group. The IRC is comprised of psychologists with expertise in cultural competence/humility and/or expertise in the experiences of a specific historically marginalized group.

A brief outline of the item development and test construction processes follows:

1. Individuals with expertise in specific domains of the EPPP (Part 1-Knowledge) are selected as item writers. Members of the IDC1 train item writers on how to write questions for the EPPP (Part 1-Knowledge) and on how to use online tools for securely submitting questions to be considered for the EPPP (Part 1-Knowledge) item bank.
2. Item writers develop questions and submit them for review. A process of validation occurs between the item writers and the subject-matter experts on the IDC1. Items are evaluated for style, format, subject matter accuracy, relevance to practice, professional level of mastery, contribution to public protection, and freedom from bias.
3. Once judged by the IDC1 subject-matter expert to be of sufficient quality, items then receive an additional level of editorial and psychometric review by the editorial staff to ensure conformity to established psychometric principles and the EPPP (Part 1-Knowledge) *Style Guidelines*.
4. Items that are approved by the IDC1 subject-matter experts and by editorial staff are then entered into the EPPP (Part 1-Knowledge) item bank.
5. A draft examination is constructed on the basis of a content outline derived from a job task analysis and role delineation study of the profession of psychology (see below). At a meeting of the ExC1, the preliminary draft is reviewed item by item. During the review, items are validated and/or replaced with bank items in accordance with the test specifications and the ExC1's expert judgment. This draft is made up only of items with known psychometric properties.
6. A final form of the examination is constructed on the basis of the ExC1's review and comments. The final form of the examination is then uploaded into the network for delivery at local test centers. The finalized form of the examination is supplemented with 50 items

for pre-testing. The purpose of the pre-testing is two-fold: 1. to gather psychometric data on newly developed items which ensures that they are performing within acceptable statistical parameters before the item is used as a scored item on a future exam, and 2. to collect statistical information used to equate exams which ensures that every candidate receives an exam of equal difficulty. These pre-test items are randomly distributed throughout the examination and are not counted as part of a candidate's score.

7. The IRC reviews any items that demonstrate differential performance as measured by the DIF across identified groups. The IRC provides feedback on items reviewed to the IDC1 Chair for possible item-level changes and overall stylistic changes. Additionally, the IRC can recommend removal of an item from the test bank.

A flowchart of this process can be found in [Table 1](#).

## TEST CONTENT AND ADMINISTRATION

The examination covers eight content areas: biological bases of behavior; cognitive-affective bases of behavior; social and cultural bases of behavior; growth and lifespan development; assessment and diagnosis; treatment, intervention, prevention, and supervision; research methods and statistics; and ethical, legal, and professional issues. The percentage of the examination devoted to each of the topics and specific sub-areas to be tested is provided in detail in [Table 2](#) (administrations from August 1, 2011, through February 14, 2018) and [Table 3](#) (administrations from February 15, 2018 forward). The examination consists of objective multiple-choice questions covering knowledge essential to the professional practice of psychology. Each form of the examination contains 225 items, of which 175 are scored and 50 are pre-test items. The pre-test items do not count in a candidate's final score.

Each item has four possible responses, only one of which is the correct answer. The total number of correct responses determines a candidate's score. Therefore, it is to the candidate's advantage to answer every item even when uncertain of the correct response. **There is no penalty for incorrect answers.** The candidate should choose the single best answer to each item.

The EPPP (Part 1-Knowledge) is administered under standardized conditions at Computer Based Test centers. Only candidates approved by a state or provincial board as applicants for licensure are allowed to take the EPPP (Part 1-Knowledge). EPPP (Part 1-Knowledge) scores are reported as scaled scores, with a range from 200 to 800. ASPPB considers the passing point for independent practice equals to a scaled score of 500. The statistical information presented in the 2024 Psychology Licensing Exam Scores by Doctoral Program includes:

- Where the number is five or greater, the number of candidates tested from the program, the pass rate, and percent scores by content area.
- Where the number of candidates tested per program is four or fewer, neither the number tested nor the pass rate is shown. This is done to protect the privacy of candidates who come from programs with low numbers of graduates.

## CONTENT OUTLINE OF THE EPPP (PART 1-KNOWLEDGE)

### For EPPP Administrations through February 14, 2018

At the completion of an extensive Practice Analysis study in 2010, the test specifications for the EPPP were revised. These specifications, included herein in [Table 2](#), were implemented for the first time with the development and administration of the August 1, 2011 EPPP. Eight content domains were identified as being related to current practice.

The EPPP performance of students in the various doctoral programs through February 14, 2018, has been summarized in Table 4 of this report and is based on the test specifications shown in [Table 2](#).

### For EPPP (Part 1-Knowledge) Administrations from February 15, 2018, Forward

In 2016, at the completion of a Job Task Analysis, the test specifications for the EPPP (Part 1-Knowledge) were again revised. These specifications, which are included herein as [Table 3](#), were implemented for the first time with the development and administration of the February 15, 2018 EPPP (Part 1-Knowledge).

The Job Task Analysis resulted in the identification and validation of underlying professional competencies; the identification of assessment methods to best measure underlying professional competencies; and revised test specifications for the EPPP (Part 1-Knowledge) updating the knowledge base and integrating additional relevant competencies. The full job task analysis report, as well as an executive summary report, is available at: [Job Task Analysis](#).

Data provided in Table 4 of this report are based on the test specifications in [Table 3](#).

The *Psychology Licensing Exam Scores by Doctoral Program* will be published annually and will include the most recent five-year window of candidate score information.

Scores are reported for first-time test takers only. This is the common method of reporting pass rate data.

## FURTHER INFORMATION

### TO OBTAIN MORE INFORMATION ABOUT:

---

**ASPPB and the EPPP Examination Program, its policies, and procedures:** Call ASPPB toll-free at 1 800-448-4069 between the hours of 8:30 am and 5:00 pm ET; or send a message to [asppb@asppb.org](mailto:asppb@asppb.org).

**Requirements for licensure/certification in the various jurisdictions:** Access ASPPB's PSY|Book of Licensing and Certification Requirements for Psychologists in North America for no charge at <https://www.asppb.net/page/psybook>. You can also visit <https://asppbcentre.org>.

**Procedures and requirements for licensure and board approval for taking the EPPP (Part 1-Knowledge):** Contact the psychology licensing or certification board in the state or province in which licensure or certification is being sought. A listing of addresses of state and provincial boards is available from the ASPPB website at: <https://www.asppb.net/page/BdContactNewPG>

**TABLE 1. ITEM DEVELOPMENT AND TEST CONSTRUCTION FLOWCHART**

The Item Development Committee (IDC1) of ASPPB identifies potential subject-matter experts to become item writers for the EPPP (Part 1-Knowledge)

The IDC1 trains item writers, either at Item Writer Workshops (IWW) or by conference calls, about the “do’s and don’ts” of item-writing

Item writers produce questions, either in advance of IWWs or prior to each Examination Committee (ExC1) meeting, each way allowing items to be written from their homes or offices where they have access to reference materials.

Every item developed is presented to all the item writers within that domain and reworked by the whole domain team prior to submission. Then items are reviewed and validated by members of the IDC1 on the basis of accuracy, relevance, professional level of mastery, contribution to public protection and freedom from bias.

If approved by IDC1 domain expert, items are entered into the EPPP (Part 1-Knowledge) item bank.

Items are edited and brought into compliance with EPPP (Part 1-Knowledge) style guidelines.

**Calibrated Item Bank**

Items are chosen for a preliminary draft of the EPPP (Part 1-Knowledge) from the Calibrated EPPP (Part 1-Knowledge) Item Bank

**Standard Item Bank**

Items are chosen for pretesting from the Standard EPPP (Part 1-Knowledge) Item Bank.

**Calibrated Item Bank**

The draft EPPP (Part 1-Knowledge) is reviewed by the ASPPB ExC1 item by item. Substitute items may be chosen from the Calibrated Item Bank

**Standard Item Bank**

Draft pretest items are reviewed by the ASPPB ExC1 item by item.

The Examination Committee finalizes exam forms, including pretest items, based on expert judgment, item statistics, and multiple reviews.

EPPP (Part 1-Knowledge) exam is uploaded to the Pearson System.

Candidates take the EPPP (Part 1-Knowledge) exam.

The EPPP (Part 1-Knowledge) is scored on-site. Candidates receive score reports after administration. Jurisdictions receive scores within 10 days.

**TABLE 2. CONTENT OUTLINE OF THE EPPP FOR ADMINISTRATIONS  
FROM AUGUST 1, 2011 THROUGH FEBRUARY 14, 2018**

Rubric	Content Area	Percent of the Exam
01	<b>Biological Bases of Behavior</b> — knowledge of (a) biological and neural bases of behavior, (b) psychopharmacology, and (c) methodologies supporting this body of knowledge	12%
02	<b>Cognitive - Affective Bases of Behavior</b> — knowledge of (a) cognition, (b) theories and empirical bases of learning, memory, motivation, affect, emotion, and executive function, and (c) factors that influence cognitive performance and/or emotional experience and their interaction	13%
03	<b>Social and Cultural Bases of Behavior</b> — knowledge of (a) interpersonal, intrapersonal, intergroup, and intragroup processes and dynamics, (b) theories of personality, and (c) diversity issues	12%
04	<b>Growth and Lifespan Development</b> — knowledge of (a) development across the full life span, (b) atypical patterns of development, and (c) the protective and risk factors that influence developmental trajectories of individuals	12%
05	<b>Assessment and Diagnosis</b> — knowledge of (a) psychometrics, (b) assessment models and instruments, (c) assessment methods for initial status of and change by individuals, couples, families, groups, and organizations/systems, and (d) diagnostic classification systems and their limitations	14%
06	<b>Treatment, Intervention, Prevention, and Supervision</b> — knowledge of (a) individual, couple, family, group, organizational, or community interventions for specific problems/disorders in diverse populations, (b) intervention and prevention theories, (c) best practices and practice guidelines, (d) consultation and supervision models, and (e) evidence supporting efficacy and effectiveness of interventions	14%
07	<b>Research Methods and Statistics</b> — knowledge of (a) research design, methodology, and program evaluation, (b) instrument selection and validation, (c) statistical models, assumptions, and procedures, and (d) dissemination methods	8%
08	<b>Ethical/Legal/Professional Issues</b> — knowledge of (a) codes of ethics, (b) professional standards for practice, (c) legal mandates and restrictions, (d) guidelines for ethical decision-making, and (e) professional training and supervision	15%

**TABLE 3. CONTENT OUTLINE OF THE EPPP (PART 1- KNOWLEDGE) FOR ADMINISTRATIONS  
FROM FEBRUARY 15, 2018 FORWARD**

Rubric	Content Area*	Percent of the Exam
01	Biological Bases of Behavior	10%
02	Cognitive - Affective Bases of Behavior	13%
03	Social and Multicultural Bases of Behavior	11%
04	Growth and Lifespan Development	12%
05	Assessment and Diagnosis	16%
06	Treatment, Intervention, Prevention and Supervision	15%
07	Research Methods and Statistics	7%
08	Ethical/Legal/Professional Issues	16%

\*For more specifics of each content area please refer to the content statements in [Table 2](#).

**TABLE 4. THE EPPP (PART 1-KNOWLEDGE) SCORES BY DOCTORAL PROGRAM,  
JANUARY 1, 2019 – DECEMBER 31, 2023 (PP. 13-34)**

Note: These scores include 2020-2022, years when education and training, and perhaps EPPP pass rates, might have been impacted by the COVID pandemic.
